Product Description

The Juniper Networks® SRX4600 Services Gateway protects mission-critical data center and campus networks for enterprises, mobile service providers, and cloud service providers. Designed for high-performance security services architectures, the SRX4600 protects key corporate IT assets as a next-generation firewall, acts as an enforcement point for cloud-based security solutions, and provides application visibility and control to improve the user and application experience.

Integrating networking and security in a single platform, the SRX4600 features multiple high-speed interfaces, intrusion prevention, advanced threat protection, and authentication, along with high-performance IPsec VPN and Internet gateway capabilities. It also offers high scalability, high availability, robust protection, application visibility, user identification, and deep content inspection to provide unparalleled control over the security infrastructure.

The SRX4600 also acts as a central enforcement point in the Juniper Connected Security framework, leveraging strong automation and actionable intelligence to protect users in a multivendor network environment.

The SRX4600 is powered by Juniper Networks Junos® operating system, the industry-leading OS that keeps the world's largest mission-critical enterprise and service provider networks secure.

Architecture and Key Components

The SRX4600 hardware and software architecture provides cost-effective security in a small 1 U form factor. Purpose-built to protect network environments and provide Internet Mix (IMIX) firewall throughput up of 75 Gbps, the SRX4600 incorporates multiple security services and networking functions on top of Junos OS. Best-in-class security and advanced threat mitigation capabilities on the SRX4600 are offered as 20 Gbps of next-generation firewall, 20 Gbps of intrusion prevention system (IPS), and up to 16 Gbps of IPsec VPN in data center, enterprise campus, and regional headquarter deployments with IMIX traffic patterns.

Table 1: SRX4600 Statistics¹
